

CyberSentinel Threat Analysis Report

Case ID: 1babb168
Timestamp: 2025-12-11 18:59:08
Threat Type: DDoS (Distributed Denial of Service)
Severity: **High**
Token Usage: 480

Scenario

The public site is receiving tens of thousands of requests per second from many regions, causing slowdown.

Analysis

To mitigate this threat, it is essential to implement robust DDoS protection measures, such as IP blocking, rate limiting, and content delivery network (CDN) filtering. Additionally, monitoring the website's traffic patterns and performance metrics can help identify potential issues before they escalate into a full-blown attack.

Recommendations

1. No recommendations provided.
